

THE PSS18 LIGATURE RESISTANT SECURITY SHIELD

Description:

The Armagard PSS18 enclosure is a protective shield designed to defend TVs within challenging behaviour environments and safeguard at-risk individuals.

Designed to reduce self-harm from the creation of ligature-points on wall-mounted indoor displays, it features a sloped roof and underside that make it difficult to knot a rope around. It provides a TV with durable protection against thrown objects and physical attacks, with its durable mild-steel (powder coated) body and a fitted polycarbonate window that's 20 times stronger than glass.

It mounts flush against the wall with wall mount provided, making it difficult to forcibly remove and use as a weapon. Ideal for use within healthcare facilities, SEN schools, communal areas, and behavioural centres. The PSS18 enclosure accommodates TV sizes ranging from 24" to 85" and is available as landscape or portrait orientation.

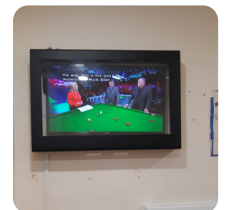

Benefits:

- Duty of Care - Safeguard those at-risk and vulnerable under your watch, whilst providing an outlet for safe entertainment.
- Reduce Replacements - A display shield reduces the incidents of TV damage, lowering the cost of repairs and replacements, so budgets can be spent elsewhere.

What Our Customers Say:

Our son lives in supported accommodation, and due to his mental condition, normal TV fittings are vulnerable. So, we bought the 43" Landscape Security Shield to protect his new smart TV. Installation was easy, and the TV works perfectly with the controller through the enclosure, with no impact on sound or picture. We're very pleased with the added security. Ian W., UK.
